Saeed Madi

Software Engineer | FullStack Web Developer NEST.js | NEXT.js |
Node.js
Jabalia, Gaza Strip

Summary

I'm Web Developer with extensive experience in building High quality
Web applications or websites.
I am a professional full-stack developer.
I enjoy the diversity and challenges that I meet every project. It
keeps me into learning new things that I like most in this profession.
I have a solid experience in Back-end Web development.

I have worked in PHP technologies and have experiences in NodeJS
and ReactJS.

My skill sets include:

Frontend skills:
* JavaScript, AJAX;
* HTML 5, CSS3, SCSS
* Adaptive layouts/frameworks - Bootstrap;
* ReactJS
* NextJS

Backend skills:
* PHP Laravel, NodeJS, ExpressJS, NestJS.

Databases:
* Relational: MySQL, Postgres;
* Non-Relational:MongoDB

Solutions I can provide :

* Management Systems
* E-Commerce Systems
* E-Learning
* Custom Websites
* Dashboard

* Landing Pages
* Static Pages
* Create & Integrate API's

It's important to me to build long term relationships with clients, so I'm always try to give my best to clients and looking for long term projects.
I am thoroughly professional of it specialist working with challenging environment with commitment to excel in my respective field.
I love my work and always try to follow the best practices. I can assure you maximum availability and error-free semantic code.
So let's get started :)

I look forward to hearing from you!
Said Madi

Experience

Gaza Sky Geeks
Instructor
October 2024 - May 2025 (8 months)
West Bank

Instructor at the University Lead Program, delivering the Web Fundamentals Development course. In this role, I was responsible for:

Material Preparation.

Teaching the Material.

Code review and troubleshooting support.

Sync Meeting with the tech team.

Project management to ensure the delivery of software products within the defined timelines.

Conducting sessions on the technologies used and providing one-on-one support as needed.

GRAMS
Full Stack JavaScript Developer
February 2025 - April 2025 (3 months)
United Arab Emirates

As a Full Stack Developer at Grams, I actively develop and lead backend solutions while also contributing to front-end development. My responsibilities include:

- Backend Development and Leadership: I am directly involved in developing and overseeing backend architectures using NestJS, leading the backend team to deliver high-performance, scalable server solutions.

- Frontend Engineering: I implement responsive and user-centric web interfaces using Next.js, focusing on enhancing user interaction and visual engagement.

- Integration Expertise: I ensure seamless integration of frontend and backend aspects of our applications, maintaining cohesive functionality across the full stack.

- CI/CD Implementation: I architect and maintain continuous integration and deployment pipelines, optimizing our development and release processes.

- Advanced Use of TypeScript: I use TypeScript extensively to enhance both backend and frontend development, ensuring robust, maintainable, and error-free code.

In this role, I am committed to leveraging advanced technologies to develop innovative web solutions that meet and exceed project goals.

Evaios
Full Stack Developer ReactJS || ExpressJS
June 2023 - November 2024 (1 year 6 months)
Amman, Jordan

highly skilled Full Stack Developer with expertise in ReactJS and ExpressJS to join our dynamic team. - Collaborate with the team to understand project requirements and translate them into technical specifications.
- Design and develop scalable, secure, and high-performance web applications using ReactJS and ExpressJS.
- Implement user interfaces with a focus on usability, performance, and responsiveness.
- Build reusable code and libraries for future use.
- Optimize applications for maximum speed and scalability.
- Conduct thorough testing and debugging to ensure the application functions correctly.
- Collaborate with front-end developers, back-end developers, and designers to ensure seamless integration of components.
- Stay up to date with the latest industry trends and technologies, and propose innovative solutions to improve our development processes.
- Participate in code reviews to maintain code quality and ensure best practices are followed.
- Troubleshoot and resolve issues reported by users and stakeholders.

Upwork
Top Rated Full Stack Web Developer
November 2021 - September 2023 (1 year 11 months)
Gaza Strip

Self-employment helped me develop skills in terms of technical and soft skills as well as increasing the network
of relationships.

Gaza Sky Geeks
Lead Mentor
June 2023 - July 2023 (2 months)
Gaza, Gaza Strip

Lead Mentor, Code Academy at Gaza Sky Geeks

is to directly integrate with the G13 Code Academy trainees teams for their projects and support with the advanced learning weeks. The Lead Mentor will play a combined role of quality assurance and scrum master. The Lead Mentor is equally accountable for the team's success in delivering a quality product on time as the team. The Lead Mentor should model and facilitate effective team and team dynamics, workflow and coding best practices.

Collaborate with G13 Code Academy trinees teams, providing direct support and guidance for their projects and advanced learning weeks.

Fulfill a combined role of quality assurance and scrum master, ensuring the team's success in delivering high-quality products on time.

Model and facilitate effective team dynamics, workflow, and coding best practices.

Participate in design workshops, contributing to initial wireframing and project planning.

Advise and supervise team workflow, promoting adherence to coding best practices.

Collaborate with other Lead Mentors, graduates, and the Code Academy team to develop and maintain best practices for this role and project phase.

Ensure the prototype meets UI/UX standards and project requirements.

Provide coding support if needed and make smart architectural decisions for efficient product delivery.

Liaise with CA Instructors, reporting progress and identifying areas needing support.

Conduct daily standups with the team and Instructors, fostering positive team dynamics.

Ensure effective GitFlow and review pull requests, providing valuable feedback and code review.

Gaza Sky Geeks
Web Developer Internship
July 2022 - November 2022 (5 months)
Gaza, Gaza Strip

An immersive, web development Bootcamp running five days a week for four months. The curriculum is "advanced" and aimed at students with pre-existing experience with HTML, CSS, and JavaScript.

Project-based Bootcamp, delivering workshops, running code reviews, and managing projects. The Bootcamp covers test-driven development, using a full JavaScript stack (JavaScript and Node.js) with relational databases. also covering aspects of UX design and project management.

The Code Academy's first immersive, 4-month career accelerating web development Bootcamp with a flagship campus in Gaza City and a second campus in the West Bank city of Hebron. This program is for anyone truly serious about putting in the time, effort, and determination to become a junior web developer ready to work in a tech company.

Education

Al-Azhar University
Bachelor's degree, Computer Software Engineering · (January 2017 - July 2021)
